

BirchAI

Birch.ai – React Developer

Who We Are:

The small but mighty team at Birch.ai is looking for entrepreneurial engineers who will build transformative healthcare solutions. Together, we will take the paperwork out of healthcare, and you will be instrumental in shaping products that healthcare stakeholders, such as doctors, love to use.

Benefits:

Work with a team that is on the bleeding edge of technology in the NLP space while improving the patient experience for all. Do that from home with a flexible schedule, and a competitive salary.

Responsibilities:

- Own the front end for the Birch.ai application
- Write high-quality reusable code
- Focus day-to-day on coding, troubleshooting, and debugging
- Conduct UI tests and optimize performance
- Work closely with our MLOps and NLP team to create best in class user experience for our early adopters
- Provide training, help and support to other team members
- Stay current on new technologies and best practices

Requirements:

- 3+ years of experience in front-end web application development using React.js and React Native
- Experience with HTML, CSS, Redux and React Table
- Experience working in an Agile environment
- Strong software engineering fundamentals
- Delivered extensible UI in production
- Experience with browser testing and debugging
- Experience integrating with API
